& well-maintained  
landscape -  
Makita's Garden Tools**

**DUB363**  
**LXT** 18v → 18v → 36v

# Powerful yet handy - Makita's range of garden tools for every requirement

### Question 1:

#### What are the advantages of LXT in Makita tools?

The LXT Advantage encompasses four key components, offering the most advanced, durable, and dependable 18V products available. Our fast-charging LXT batteries, Rapid Optimum Charger, industry leading brushless motors, and Star Protection Computer Controls collaborate to deliver unparalleled performance. Makita's Cordless Outdoor Power Equipment sets new standards in motor and battery technology, outpacing the competition with innovative advancements.

### Question 2:

#### What are the advantages of the Makita BL Motor?

The Makita-built Brushless Motor offers several advantages. Firstly, by eliminating carbon brushes, the motor operates cooler and more efficiently, leading to an extended lifespan. Additionally, the electronically-controlled Brushless Motor efficiently utilizes energy, adjusting torque and RPM to meet the specific demands of the application. Furthermore, without brushes to create friction, a Brushless motor can generate a greater amount of torque per weight. This increased torque means less power is needed for daily use, contributing to the motor's efficiency and prolonging the overall lifetime of the product. With reduced maintenance requirements, the Brushless Motor offers enhanced reliability and longevity.

### Question 3:

#### How can I meet my work requirements with a Portable Power Pack?

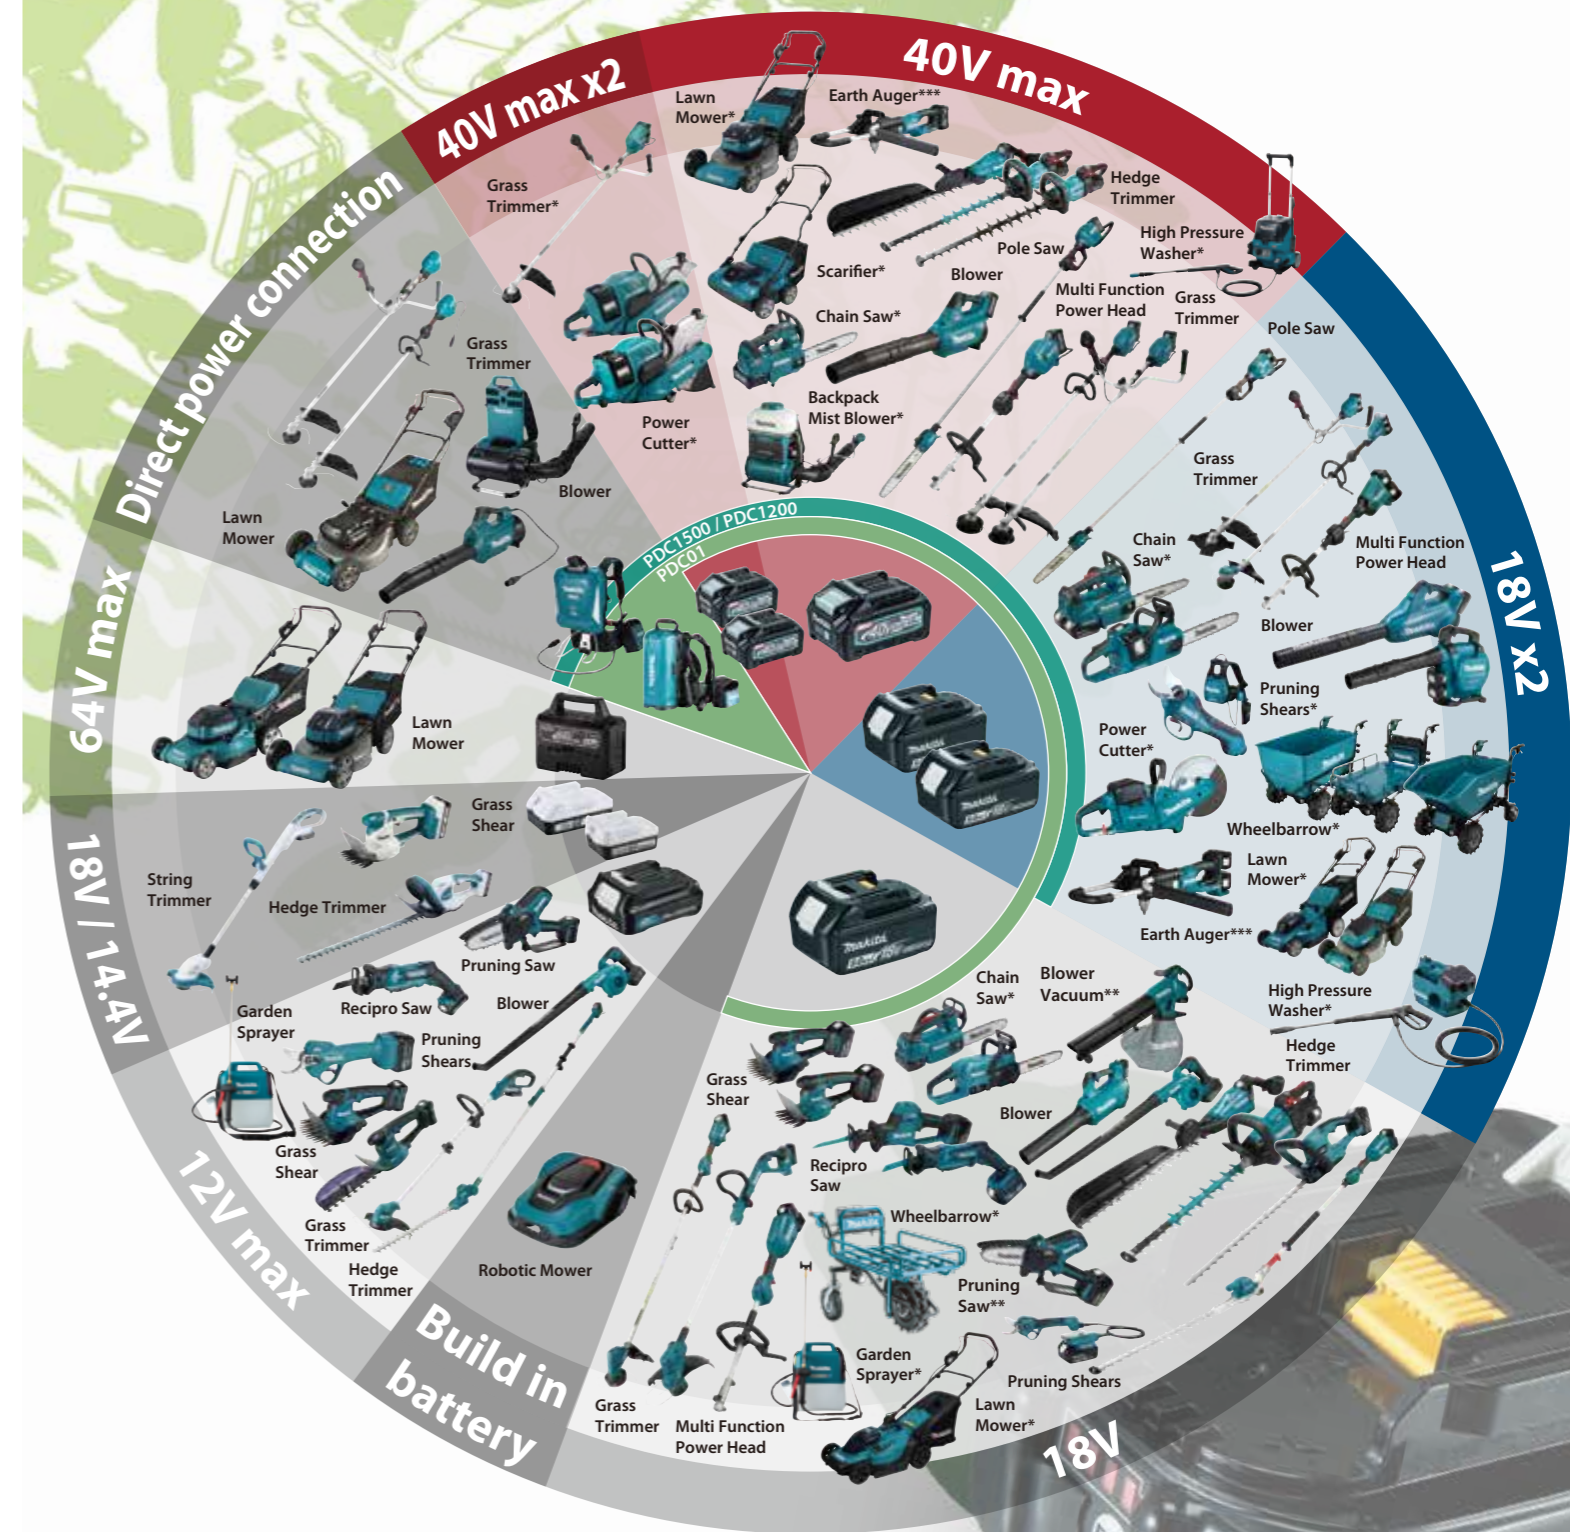

The Makita PDC1200A01 offers extended tool runtimes, enabling you to accomplish more tasks throughout your workday. Equipped with an LXT 18Vx2 adaptor as standard, this power pack is compatible across two platforms (LXT 18Vx2 / Direct Connection), broadening the scope of tasks you can undertake. With an energy capacity of 1,206Wh, you can charge it overnight using the AC charger (6-hour charge time) to ensure uninterrupted power for a full day of work. The comfortable harness is adjustable to suit various heights and can also be detached from the unit for stationary power, minimizing fatigue during extended use.

# Versatile, Powerful, Handy - the Makita Advantage

## New Solutions for Landscapers

Your world is changing. Increasing regulations across the nation are limiting the use and availability of gas-powered equipment. This will affect how you run your business, and Makita is here to help with a range of battery-powered commercial products to replace your gas equipment. Makita brings leading innovation to the cordless power equipment category, backed by impressive numbers: over 100 years of motor engineering. Makita offers a comprehensive system of outdoor power equipment with numerous gas-replacement solutions for brush cutting, chain saws, blowers, hedge trimmers, and clean-ups. With a constant focus on new technology and power management, LXT® stands as the world's largest professional cordless Outdoor Power Equipment system powered by 18V lithium-ion slide-style batteries.

# HIGH POWER & HIGH SPEED

## Excellent cutting performance equivalent to 30CC class engine chain saws

### Interview

#### Hats off Makita!

We are delighted with our experience using Makita tools. They are incredibly convenient, portable, and notably require zero maintenance, unlike some competitor tools which frequently demand upkeep. Access to service and spares is convenient, and the responsiveness of suppliers, even at unconventional hours like 1:00 am, is truly commendable.

In comparison to tools from other companies, which often suffer from damage, our extensive use of Makita tools, including lawnmowers and brush cutters, has resulted in significant petrol savings. Their exceptional battery life and lightweight design make them indispensable for maintaining our ashram premises.

Cleaning tools, in particular, are remarkably versatile, allowing us to reach every corner and crevice effortlessly. Previously, using manual brooms consumed 2-3 hours and required 6 to 7 people for labor, but now, a single person can accomplish the task within an hour. Furthermore, brush cutters have proven invaluable in reducing petrol consumption. Unlike petrol-driven machines prone to starting issues, Makita's battery-powered tools overcome this challenge efficiently. Additionally, cordless tools are user-friendly, emitting minimal noise and vibration.

In our operations, we also rely on blades, ropes, & chainsaws. While chainsaws require careful lubrication maintenance, they offer excellent performance overall. The power bank is exceptional, offering a reliable 6-7 hours of power.

We utilize it for various tasks, including powering cleaning and grass-cutting machines. Hats-off to Makita!

# Excellent ability to perform continuous cutting achieved by high cooling capacity that suppresses heat generation of the controller & motor

**DUR369A**

**LXT** 18V + 18V → 36V

3 Stage Speed Control - high, medium & low speed can be changed by simply pushing a button on the easy to use LED display

18V x 2 Brushless Motor is powered by two 18V Li-ion batteries (not included) providing up to 1kW of output which is equivalent to 30cc petrol engines

Reverse Switch allows tangled grass clippings can be removed by slow reverse rotation of the cutting tool (automatically stops after three seconds) by pressing button and pulling trigger

Active Feedback technology for when the metal blade (not included) hits a solid object like a tree stump or fence, the sudden decrease in rpm triggers the brake, stopping kickback occurring

XPT - extreme protection technology, is an advanced series of seals and channels to direct dust and moisture away from key internal components

## DUR369A - Cordless Grass Trimmer

Makita DUR369 is a lightweight, powerful line trimmer providing the equivalent power to 30cc petrol models, powered by Makita's 18Vx2 technology. It features a max cutting capacity of 430mm (17") whilst the 3-stage speed control allows the user to match the right speed for the job. The reverse function avoids long grass from tangling around the head and the Automatic Torque Drive allows the DUR369 to take on the toughest of tasks with ease.

Its 3-stage speed control (high, medium, and low) can be adjusted effortlessly by pushing a button on the intuitive LED display.

The reverse switch allows for the removal of grass clippings through slow reverse rotation of the cutting tool (automatically stopping after three seconds) by pressing the button and pulling the trigger.

Featuring a soft start/electric brake, the cutting head starts slowly and brakes to a stop, ensuring users can swiftly and safely commence operation.

Designed with a U-handle, the design ensures that the centerline of the handlebars remains aligned with the user's center of gravity.

Automatic Torque Drive automatically increases the motor's torque when increased load is detected, enhancing efficiency and performance.
