260 mm Cordless Rear
Handle Saw

Minimum Effort. Maximum Output.

Makita's cordless XGT range of Sawing & Hammering to Sanding Tools.

Question 1:

How does Makita service and support its customers?

At Makita, our commitment to customer satisfaction goes hand in hand with our top-quality tools. We pride ourselves on delivering exceptional service through our knowledgeable Customer Service Representatives and extensive Sales Team. Our skilled technicians are well-trained to provide support, and we ensure that genuine Makita replacement parts are available for any power tools requiring service or repair. Your satisfaction is our priority!

Question 2:

Does Makita offer brushless motor tools?

Absolutely! Makita provides an extensive selection of brushless motor tools. These brushless motors are engineered for enhanced efficiency, longer runtime, and increased tool longevity compared to traditional brushed motors. You can find brushless options across various categories, including drills, impact drivers, saws, and many more applications.

Question 3:

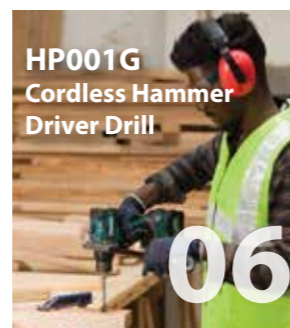

Are Makita cordless tools compatible with batteries from other brands?

Answer: No, Makita cordless tools are specifically designed to work with Makita batteries only and our battery system is not compatible with other brands. While some third-party adapters claim to enable compatibility between different battery brands, including Makita, using these adapters can sometimes impact on Machine performance and void warranties. For optimal performance and safety, it's generally best to stick with the manufacturer's recommended batteries.

Interview

End User:
George Leuzinger, Timber Structures

From Sawing & Hammering to Sanding High-Performance Tools for Every Jobsite

As structural fabricators specializing in timber roofing, we handle both factory work and on-site erection, and cordless tools have made a huge difference.

In the shop, cordless tools simplify tasks like trimming long beams, while on-site, they offer the freedom to work at great heights, especially in rural areas with unreliable power.

We've found Makita tools to be the most reliable and well-made, with longer-lasting batteries compared to other brands.

We now use a lot of 18V batteries and plan to expand to more 40V tools in the future.

Cordless tools have eliminated the mess and hassle of cords, improving efficiency and safety on the job.

We highly recommend Makita tools for their durability and performance.

SPEED, POWER, PRECISION A DRILL DESIGNED FOR DOMINANCE

Compact overall length for easy handling and control

LED job light with afterglow feature illuminates the work area

HP001G

XGT 40V Max

13 mm Cordless Hammer Driver Drill

All metal 13 mm self-ratcheting chuck for improved bit gripping strength and durability

Keyless chuck for quick and easy bit installation and removal

FN001G

Cordless Brad Nailer

EFFORTLESS NAILING WITH UNMATCHED POWER & VERSATILITY!

FN001G - Cordless Brad Nailer

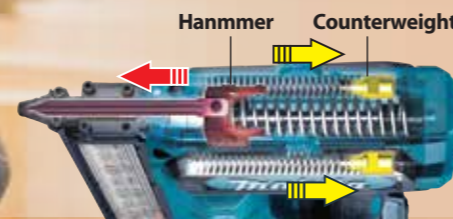

Makita FN001G is 40V Max XGT Brushless 18Ga. Brad Nailer is an ideal solution for wide variety of fastening applications such as installing narrow trim and molding. The FN001G is compact, powerful and drives a range of 18 gauge brad nails from 15mm to 40mm with a magazine capacity of up to 100 nails. The brushless motor and re-designed spring drive mechanism allow for rapid re-load times and ability to drive nails into hardwood.

Work volume on a single full battery charge about **5,000** nails

with battery: BL4025
nail: Length 15-40 mm,
Gauge 18 Ga

Counterweight mechanism

reduces vibration by moving a counterweight in the opposite direction of the hammer.

Contact top designed for easy nail placement

Nail shooting port is located in the center of contact arm, enabling accurate nail placement.

Slim nose with nose adapter

Driving depth adjustment

LED job light

Battery Powered Random Orbit Sander Series

SMOOTH POWER, PERFECT FINISH SANDING MADE EFFORTLESS

High power & compact design

Work efficiency*1	
BO001CG	65% UP*2
BO002CG	30% UP*3
BO003CG	15% UP*2
BO004CG	10% UP*3
BO005CG	60% UP*2
BO006CG	60% UP*2

*1 Compared when sanding SPF
*2 Compared with our 18V models
*3 Compared with our corded model

Battery Powered Random Orbit Sander

Orbit diameter: 5 mm

BO001CG 125 mm
BO002CG 150 mm

Orbit diameter: 3 mm

BO003CG 125 mm
BO004CG 150 mm

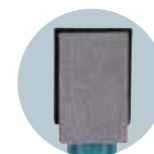

Battery Powered Orbital Sander

Orbit diameter: 3 mm

BO005CG

Pad shape is switchable

The pad can be switched to the triangular pad depending on applications.

Battery Powered Orbital Sander

Orbit diameter: 3 mm

BO006CG

Pad shape is switchable

The pad can be switched to the square pad depending on applications.

Excellent maneuverability

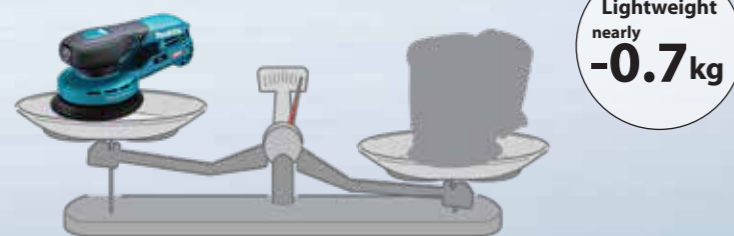

The tool's handle is designed to be as close as possible to the sanding surface and the center of gravity is optimally balanced to achieve excellent maneuverability during fine operations.

Low overall height

96 mm | 153 mm
BO001CG/BO002CG/BO003CG/BO004CG | Our 18V model
[BO005CG/BO006CG: 99 mm]

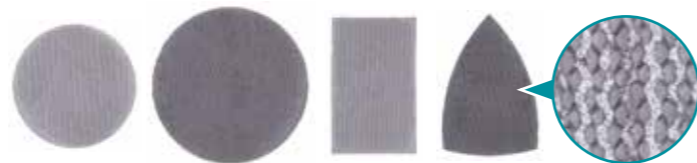

Lightweight design

0.92 kg | 1.6 kg
BO001CG | Our 18V model

New abrasive disc and abrasive paper (net type)

- Compared with the current abrasive discs or papers, the net type abrasive discs or papers reduce the chance of being clogged with dust, allowing for long continuous operation.
- Improved efficiency for paints
- The abrasive discs or papers can be attached to the tool with the hook and loop fastener, allowing them to be attached to our current sanders.

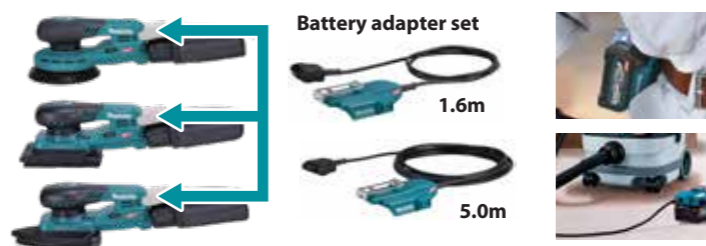

Pad saver for reducing wear of pad

- The replacement frequency of the pad, due to wear is reduced by attaching a replaceable pad saver between the pad and the abrasive disc or paper.
- Pad saver can be attached to the pad with the hook and loop fastener.

Connected via connector

- Battery adapter can be connected by inserting the connector into the tool.
- A large lever for easy one-hand attachment /detachment

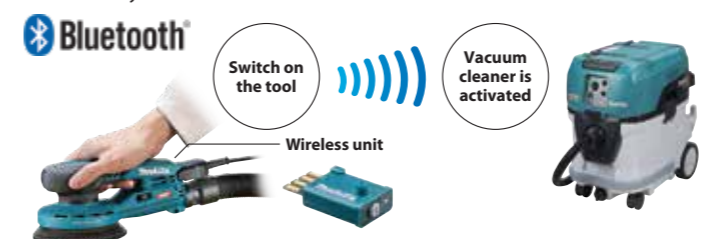

Connectable to Vacuum cleaners

Selectable from self dust collection (with dust bag attached) or forced dust collection (with vacuum cleaner connected) depending on applications

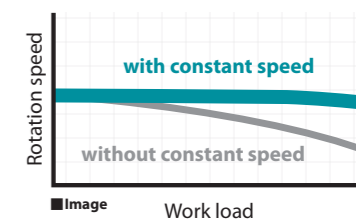

AWS Auto-start Wireless System

Connects to compatible vacuum cleaners with Bluetooth. The vacuum cleaner automatically runs while the switch is on.

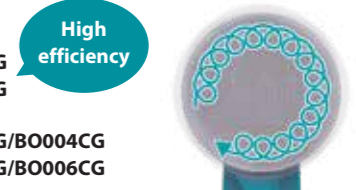

Constant speed control

Constant speed control suppresses rotation fluctuation to provide stable sanding.

Orbit diameter

5 mm | BO001CG, BO002CG
3 mm | BO003CG/BO004CG, BO005CG/BO006CG

Dust bag

- The cap of Dust bag can be removed with a large lever in the same way as the connector of Battery adapter.
- Dust in Dust bag can be discharged easily.

XPT
(eXtreme Protection Technology)

George Leuzinger, an Indo-Swiss architect who has been based in Bengaluru for several decades, is a specialist in timber roofing using glulam structures. Glulam, short for glued laminated timber, involves assembling thin slices of non-primary forest timber such as coconut or Malabar neem bonded together with resin-based adhesives. Constructing these glulam structures demands tools that are precise, powerful, & lightweight. This is where Makita's 40V cordless tools seamlessly fit into Leuzinger's vision.

"Makita tools have proven to be incredibly reliable and well-crafted, with batteries that outlast those of other brands we've used. We've been using a lot of 18V batteries & are excited to expand into more 40V tools. Cordless technology has revolutionized our workflow no more tangled cords, and it's enhanced both efficiency & safety on site. Looking forward, Makita tools will continue to be a cornerstone of our operations, thanks to their durability, performance, & the ease with which they handle tough jobs."
