Frequently Asked Questions: Makita PDC1200 Battery

Question 1:

What is the Makita PDC1200, and why should I choose it over standard batteries?

The Makita PDC1200 is a 1,200Wh lithium-ion backpack battery that delivers extra-long runtime for cordless tools in the 40V max XGT and 18V LXT ranges.

Think of it as a power station you can wear ideal for professionals in landscaping, facility maintenance, and construction who need consistent, all-day power. It reduces downtime from battery changes and ensures uninterrupted performance across demanding jobs.

Question 2:

How do I charge the PDC1200, and how long does it take?

The PDC1200 uses the Makita DC4001 charger, specially designed to handle its large 1,200Wh capacity.

Charging time: About 6 hours using the AC-powered wall or desktop charger.

A built-in cooling fan helps manage heat during long charge cycles, ensuring safe & efficient charging.

Although 6 hours may seem long, remember this is an industrial-grade battery, not a regular tool pack. Most users charge it overnight & work through the next day. For continuous operations, many keep two units one in use & one charging.

Question 3:

Is the PDC1200 safe and durable for outdoor or commercial use?

Absolutely. The PDC1200 is built for tough job sites with a strong focus on safety and durability:

- * IPX4 Water Resistance: Works safely in light rain or wet conditions.
- * Rugged Design: Reinforced outer case protects against drops, bumps, and vibrations.
- * Smart Battery Management System (BMS): Prevents overcharging, overheating, & overloading.
- * LED Indicator Panel: Shows real-time battery level and system status.
- * Zero Emissions: No fumes, fuel, or fire risks perfect for both indoor and outdoor use.

This combination of safety, efficiency, and environmental friendliness makes it a reliable choice for professionals.

Question 4:

Is the PDC1200 compatible with all Makita tools?

The PDC1200 works with a wide range of Makita cordless tools, depending on the adapter used: The battery connects via a cable and adapter instead of fitting directly into the tool. Always check your tool's model number and Makita's compatibility chart before purchase.

If you're using high-power tools like cordless mowers, blowers, or chainsaws, refer to Makita's product catalogue or support site for approved pairings. Makita. Always verify adapter compatibility with your specific tool model.

If you're using a high-power tool like a cordless mower, blower, or chainsaw, check Makita's support documents or catalogue for approved pairings.

XGT Battery Series

XGT is a new system with its own tools, batteries, and chargers. A combination of innovative tool design and higher output batteries provide a genuine solution for high demand industrial users.

Optimum power supply system and Optimum charging system

The XGT range is powered by intelligent technology that lets the tool and battery communicate seamlessly. This two-way digital exchange ensures optimum power delivery, efficient charging, and unmatched performance so every job feels smoother, faster, and more powerful.

Tool ↔ Battery ↔ Battery Charger
Digital communication

Built Tough

High durability specifications specially designed for 40Vmax Li-Ion batteries

4-LED fuel gauge indicator

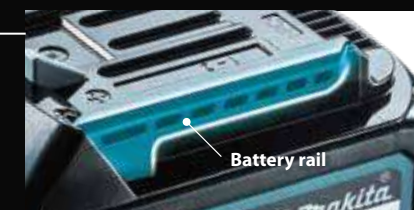

Shock absorption structure

Terminal short-circuit prevention
The protection wall is provided between terminals against water and dust.

Waterproof Triple-layer Structure
prevents cell failure due to water and dust.

High Rigidity Battery Rails
Durable slide in battery rail that holds the battery and the tools firmly and securely to withstand high power products

PDC1200

Powered by 36V-40Vmax built-in battery

1,200 Wh high capacity

IPX4

Charger: DC4001

Charging time: 360 min

PDC01

Powered by up to four 18V LXT batteries

RELENTLESS CUTTING EFFORTLESS GRINDING

In masonry cutting, the max output power is 40% higher than DGA404 series, similar to 9564H series

High durability; The upsized ball bearings support the rotor to withstand the high power of XGT tool; New switch with reduced contact wear

AFT (Active Feedback sensing Technology) turns the motor off if rotation speed suddenly slows or wheel is forced to stop

Electric brake for maximum productivity and increased operator safety

Slide switch with lock-on for operator convenience

GA003G

XGT 40V Max

100 mm
Cordless Angle Grinder

Feature

GA003G - 100mm (4") Cordless Angle Grinder
Powered by 40Vmax XGT Li-Ion Technology

The Makita GA003G combines the strength of a 1,000W class AC grinder with the freedom of cordless operation. Driven by a high-efficiency brushless motor and the 40Vmax XGT battery, it delivers up to 40% faster cutting speeds than the 18V equivalent.

Built to perform in the toughest jobsite conditions, the GA003G features enhanced heat dissipation and advanced protection against dust and debris, ensuring long-lasting durability and continuous heavy-duty use.

For added confidence, the grinder is equipped with Active Feedback Sensors that automatically shut down the tool in case of kickback, along with soft start, anti-restart, and an electric brake that quickly halts wheel rotation for safer operation.

Interview

End User:
Amitabh,
Forms & Surfaces Water Proofers Pvt. Ltd.
BUILT TO BREAK BOUNDARIES!

Around 2008, most of our machines were corded tools like hammer drills for waterproofing, grinding, & dismantling. Then we invested in a few Japanese machines, one of which ran faultlessly for three full years. Since then, newer machines often seem less durable and sometimes break down within six months.

We appreciate Makita's machines. Our team finds them much easier to use, especially with features like AVT, AFT, AWS so we purchased around 30 Makita tools. However, after-sales service is an area that needs attention. In big cities, it's easier to send machines to a service center, but for remote sites like ours, dealer charges can be high and trust is often an issue. Downtime really matters a machine being out for repair even for a couple of days greatly affects our work.

With Makita's newer cordless BLDC tools, we've seen a huge benefit. They're lighter, last longer, and don't overheat a real improvement over traditional machines. Going cordless has increased productivity and efficiency.

Makita has built a truly reliable service ecosystem. It's easy to find support when we need it, and genuine spare parts are always available. The dealer network is strong and responsive, and every interaction feels efficient and fair. Knowing that Makita stands firmly behind its products gives us the confidence to keep choosing their tools for our projects.

POWER. PRECISION EVERY STRIKE COUNTS

Feature

The HR005G 40VMax Brushless Rotary Hammer offers both rotary hammer & hammer-only modes, delivering versatile performance for heavy-duty tasks. Its variable-speed trigger provides up to 500 rpm and 2,900 blows per minute, ensuring efficient drilling & chiselling. Compatible with SDS-MAX chisels, drill bits up to 40 mm, and core bits up to 105 mm, the HR005G is ideal for a wide range of professionals, including masons, concrete contractors, plumbers, electricians, & general contractors seeking a best-in-class rotary hammer.
