FAQs:

What's on your mind?

Question 1:

Are Makita tools compatible with accessories from other brands?

Makita tools are often compatible with accessories from other brands. However, we recommend using genuine Makita accessories to get the best performance, durability, & safety. Makita offers a wide range of accessories specifically engineered to maximize the efficiency & versatility of your tools. While certain accessories like drill bits or blades may work across brands, items such as batteries, cases, & attachments are designed to integrate seamlessly within the Makita ecosystem for optimal results.

Question 2:

What is Makita doing to reduce its environmental impact?

Makita has adopted a comprehensive strategy to minimize its environmental footprint across all stages of the product lifecycle from design to disposal. The company is committed to achieving net-zero carbon emissions & accelerating the shift to battery-powered tools. Makita focuses on reducing carbon emissions, using clean energy in manufacturing, developing sustainable product designs, adopting eco-friendly packaging, & supporting end-of-life recycling. Together, these initiatives reflect Makita's commitment to a circular economy and a decarbonized future.

Question 3:

Can I use third-party chargers or batteries with Makita tools?

We strongly recommend using only genuine Makita batteries & chargers to ensure safety, performance, & warranty protection. Using non-genuine batteries can void your warranty and may damage your tools. Poorly designed batteries can overheat, catch fire, or fail prematurely. Makita's Battery Management System (BMS) uses smart chips that communicate with the tool & charger to prevent overcharging & overheating, helping to keep your equipment safe and reliable.

Mehul Gajjar, Carpenter from Ahmedabad

Makita – A Carpenter's Everyday Essential

A Carpenter from Ahmedabad. Since Makita had set up its display office in my city in 2020, I've been using makita power tools - especially their 40V XGT cordless track saw. Even in 2025, no other company in India offers a cordless track saw like this.

The XGT track saw gives me great power, depth, and a smooth finish - much better than traditional corded cutters. I also picked up accessories like the 118" and 55" tracks, clamps, and a cordless vacuum to keep my workspace clean.

After two years of great performance and long battery life, I've added more XGT tools to my kit. I've never had an issue with any of the nine tools I own. Makita's continued investment in India means I always get the tools and accessories I need.

I appreciate Makita's support and wish the team all the best for the future. Thank you for making a real difference to my work.

Stronger Business, Smarter Tools – Thanks to Makita

Light in Hand.

AS001G

XGT 40V Max

Brushless Cordless
Dust Blower

Max air velocity
200
m/s

[with Nozzle 7 / mode: 4]

Max air volume
1.1
m³/min

[without Nozzle / mode: 4]

For inflation

Nozzle 13 set

Part No. 191X15-3

Nozzle diameter: ø13mm
(Same as the caliber of the machine)

- For blow-off works
- For inflating large play pools, etc.

Nozzle 7 set

Part No. 191X13-7

Nozzle diameter: ø7.0mm

For filter cleaning

Nozzle 3 set

Part No. 191X11-1

Nozzle diameter: ø3.0mm

For cleaning narrow spaces
(can be used like an air spray can)

Flexible nozzle complete set

Part No. 191X21-8

Nozzle diameter:
ø6.0x800 (Hose)

For blowing dust away from OA equipment or narrow spaces where this machine cannot enter

For inflation

Wide range nozzle set

Part No. 191X19-5

Nozzle diameter: ø6.0mm
(each hole)

For wide range blow-off

Pinch valve nozzle set

Part No. 191X17-9

Nozzle diameter: ø7.0mm

For inflating/deflating inner tubes and beach balls

Long nozzle set

Part No. 191X78-9 Nozzle diameter: ø8.0mm

• For cleaning anchor holes
• For cleaning narrow spaces that are out of reach

• Long nozzle R can be used as a single item.
• It can also be used as an assembly with Nozzle 13.

For deflation

Air vent hose complete set

Part No. 191X23-4

Nozzle diameter: 13mm
(Same as the caliber of the machine)

For inflating/deflating inner tubes and beach balls
(Remove Dust cap complete from this machine and attach this hose.)

Rubber attachment 20-30 set

Part No. 191X25-0

Nozzle diameter: 7.0mm

For deflation large play pools and inflatable beds etc.*1

Rubber attachment 65 set

Part No. 191X27-6

Nozzle diameter: ø65mm

For deflating futon (bedding) compression bag*1

For product protection

Filter C complete set

Part No. 191X29-2

For use of the machine in a dusty environment

(Remove Dust cap complete from this machine and attach this Filter.)

*1 Used by attaching to Nozzle 13 and Air vent hose
