Optimum speed selection and assorted accessories for a wide range of sanding jobs

Ergonomic Housing Top; optimum design for single-handed operation
Fits your palm ideally because of its low height and round design.

Variable Speed Control Dial
Simply turn the dial to preselect the optimum sanding speed to suit the material or the desired finish.

Soft Rubber Grip
Fits your hand perfectly for controlled operation.

Large and Tough Cord Guard
Excellent flexibility protects the cable from disconnection.

1

2

Sanding Pad Brake
Saves the workpiece from sanding scratches when the running machine is pressed against the workpiece.

"Hook and Loop" Pad Fastening System
Quick and easy to change accessory discs.

1. Detachable Front Handle
Convenient for corner sanding.

2. Dust Bag Convenient for Disposal of Dust
Can be detached by merely pushing a button for quick disposal of dust.

Effective System of Integrated Dust Extraction

Makita BO6030
Competitor Tool

- The large vacuum fan for more effective dust extraction.
- Can be connected to the Makita vacuum cleaner.

When sanding a workpiece of spruce fir with abrasive paper #60 for two minutes.

Dust extracting rate

Lower Vibration, More Efficient Sanding

Makita BO6030
Competitor Tool

Compared with other same class, BO6030 sands more than 120% although its vibration is almost at the same level.

When sanding a workpiece of spruce fir with abrasive paper #60 for two minutes.

100 120%
