## Mulching function

A shredding blade cuts sucked  
fallen leaves into fine mulch, while  
drastically reducing the volume of  
the leaves for much less frequent  
emptying.

## Motor interlock system

The motor does not start up until the nozzle and fan cover have been properly installed.

## Variable speed control by trigger, with Cruise control lever for lock-on operation

Cruise control lever allows you to lock the variable speed control trigger at a desired power level to obtain the convenience similar to that of engine blowers.

## 2 Power modes

Mode 1: Low

Mode 2: High

## Sub handle

makes it easier to hold the machine sideways both in blower and vacuum applications.

## Mode 1

Recommended for vacuum use, with a max blowing force of 7N.

And thanks to the proper suction power:

- Able to suction fallen leaves, and not able to suction stones.
- Able to perform a long continuous operation

10v + 10v → 36v
