Smooth and efficient trimming

Equipped with BL motor to increase the number of strokes and output power for smooth and efficient trimming.

Constant speed control suppresses rotation drop to enable stable mowing.

New chip receiver (option)

can make it easier for user to collect leaf and twig debris, thanks to:

- Lower height of the connecting levers
- Reduced step height of the edge of the chip catching plate

Highly durable crank mechanism

Increased crank wall thickness can:

- reduce the chance of falling off of the blade from the crank.
- increase the contact area between the crank and blade, reducing wear of the crank.

Redesigned switch lever easy-to-press

can be pressed without gripping the front handle deep in your palm, allowing for easy on/off control.
